Indian Makhana for Global Markets

Indian Makhana / Fox Nuts — Bulk & Export Supply

SOURCED FROM INDIA'S MAKHANA-GROWING REGIONS • B2B & PRIVATE LABEL

About Makhana

Makhana, also known as **Fox Nuts** or *Euryale ferox*, is a traditional aquatic seed cultivated in India and valued as a versatile food ingredient and snack. Harvested from ponds and wetlands, the seeds are processed and puffed to produce the light, white makhana known across Indian food culture — and increasingly, across international markets.

Indian Makhana is used across a wide range of food categories:

Roasting

Alight, roast-friendly base product for plain and seasoned preparations.

Snacking

Ready-to-eat snack formats for retail and food-service buyers.

Flavoured Products

A neutral base that carries seasoning and flavour coatings well.

Traditional Preparations

Used in Indian sweets, curries, kheer and festive food preparations.

Health-Conscious Foods

Popular in better-for-you snacking and modern health-food ranges.

Food Manufacturing

An ingredient for mixes, bars, breakfast products and formulations.

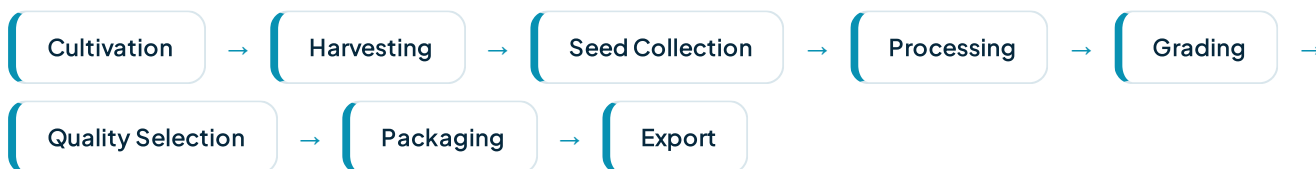

Private-Label Ready

Makhana is increasingly packed under private-label snack and health-food brands worldwide. AquaFionix can discuss product specifications, grades and packaging formats according to buyer requirements.

From Indian Waters to Global Markets

Makhana is cultivated in ponds and wetlands — with India's Mithila region of Bihar recognised as the country's primary makhana-growing belt. From cultivation to export packing, the product moves through a structured journey before it reaches international buyers.

Sourcing Regions

AquaFionix focuses on export-oriented sourcing from India's established makhana-growing regions, coordinating quality selection and supply for commercial orders.

Structured Handling

Product moves through grading, quality selection and packaging stages before dispatch, aligned with buyer specifications and destination-market requirements.

Available Makhana Grades

Makhana is commercially differentiated by **size, appearance, whiteness, cleanliness, puffing quality and buyer specification**. In Indian trade, makhana is commonly graded by *Suta* count and pop size (mm). AquaFionix supplies across commercial categories — **grades and specifications can be supplied according to buyer requirements**.

Grade Category	Appearance	Typical Use	Packing Availability
Premium	Large, uniform pops; bright white appearance; carefully hand-selected	Premium retail packs, gifting, high-end snack brands	Retail pouches, private label, bulk
Standard	Good, consistent pops; light colour; clean selection	Retail snacking, flavoured products, food service	Retail pouches, bulk bags, cartons
Commercial	Mixed sizes within agreed specification; clean and trade-ready	Wholesale, repacking, value product ranges	Bulk bags and cartons
Industrial / Processing	Supplied to agreed processing specification	Food manufacturing, ingredient use, further processing	Bulk industrial packing

Indicative categories only. Actual grades, sizes and availability depend on sourcing and are confirmed against each buyer's requirements. No fixed size measurements are published — specifications are agreed per order.

Commonly Traded Grades

Indian trade commonly references grades such as 4 Suta, 5 Suta, 6 Suta and 6+ Suta, alongside handpicked and machine-graded selections.

Product photography: AquaFionix makhana grade samples. Grade availability is subject to sourcing and confirmation per order.

Premium Quality Makhana

Product photography: AquaFionix premium makhana selection.

Quality Attributes

- ✓ Clean appearance
- ✓ Good puffing
- ✓ Uniform selection
- ✓ Light colour
- ✓ Low visible impurities
- ✓ Suitable for premium food applications
- ✓ Carefully selected according to buyer specifications

Quality is assessed against agreed buyer specifications for each order. AquaFionix does not publish laboratory, organic or certification claims; product documentation is arranged as applicable to the product, shipment and destination market.

Versatile Food Applications

Roasted Makhana

Plain or lightly salted roasted makhana for healthy-snack ranges.

Flavoured Makhana

Seasoned and coated variants developed for snack brands.

Snack Products

Retail-ready snack packs for supermarkets and distributors.

Makhana-Based Foods

Traditional and modern food preparations built around makhana.

Ingredient Use

An input for mixes, breakfast products and food manufacturing.

Private-Label Products

Makhana packed and branded for private-label buyers.

AquaFionix can discuss product specifications, grades and formats according to buyer requirements.

06 BULK & EXPORT SUPPLY

Bulk Supply for International Buyers

AquaFionix is developing export-oriented Makhana supply for international buyers. Product specifications, grade, packaging and commercial quantities can be discussed according to buyer requirements.

Importers

Distributors

Wholesalers

Food Manufacturers

Supermarkets

Private-Label Brands

Foodservice Companies

Trading Companies

Minimum order quantities and pricing are shared on a per-inquiry basis, depending on grade, packaging and destination.

Packaging Options

Packaging is arranged around the product, order quantity and destination market. Common formats include:

Bulk Cartons

Export-oriented carton packing for commercial and wholesale orders.

Food-Grade Bags

Food-grade bulk bags suitable for repacking and food service.

Vacuum Packaging

Vacuum-packed formats for extended handling and shelf presentation.

Retail / Private Label

Stand-up pouches and retail-ready formats with buyer branding.

Packaging options are subject to product, order quantity and buyer requirements. Not every format is offered for every order — formats are confirmed commercially per inquiry.

CUSTOM BRANDING

Private Label & Custom Packaging

Private-label and customized packaging options can be discussed for suitable commercial orders, subject to quantity, specifications and regulatory requirements. Share your brand, format and destination-market needs, and our team will respond with suitable options.

Quality & Export Compliance

Product specifications, quality documentation and export-related certifications will be arranged or provided as applicable to the product, shipment and destination-market requirements.

Specific documentation and certifications may vary according to the destination country and buyer requirements. AquaFionix's export-related registrations and destination-specific certifications are currently being evaluated and obtained as applicable.

09
TARGET MARKETS

Global Market Opportunities

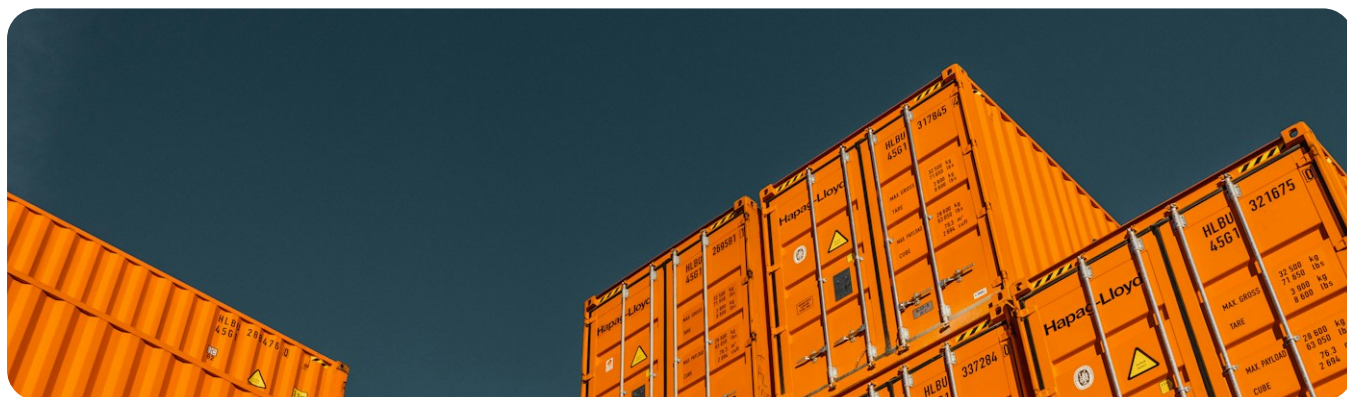

AquaFionix is developing export-oriented Makhana supply toward the following target markets. This reflects our development focus and does not imply existing exports unless confirmed.

UAE

Middle East

Europe

Other International Markets
